

About 3Space

Want to spread the word about 3Space but not sure what to say? Feel free to use the following information about what we do and how we do it for anything from press releases to promotional material, posters to websites!

What is 3Space?

3Space is an innovative new charity which makes empty commercial properties around the UK available for free for use by charities, community groups, social enterprises and other non profit organisations. Our mission? For all empty property to be recognised as an available resource that can deliver immediate social benefits and be a catalyst for longer term regeneration.

What are the benefits?

Working with 3Space allows charities to experiment with creative or fun projects. People love pop-ups, and they are perfect for charities and community groups – allowing users to expand operations, increase profiles and reach new audiences – all with minimal financial commitment.

An empty shop can be used to:

- promote a cause
- raise funds
- test an idea
- deliver workshops, training or education
- host a community project
- provide performance, rehearsal, art or theatre space

How does it work?

3Space is funded by landlords, who benefit from having a charity use the space. The only 'catch' is that the properties remain on the market, which means if a commercial tenant is found, users have to leave. This can be in as little as 7 days and while this does mean that projects need to be flexible, some properties have been in use for over a year!

Where are the spaces?

3Space currently have properties available in a range of locations across the UK. To find out how to apply, to keep up-to-date with our properties, or to see how other organisations have used our spaces successfully, find us online or if you've got any questions just email us at info@3space.org
